

SoilCares Training Package

Learn to know your soil!

Soil: the invisible resource

Soil is the most important, yet invisible resource of millions of farmers worldwide. Yet, soils often do not receive the attention it deserves; it is complex and its functioning is not visible for the human eye. SoilCares Foundation makes soil visible and builds the capacity of land managers worldwide. Join our training and become your own soil expert.

Practice makes perfect

For practical learning experience counts. In all our trainings we go out to the field, in many cases using the SoilCares Scanner to put knowledge in the hands of the practitioners. See www.soilcares.com.

The SoilCares Training Package

SoilCares Foundation has developed a dedicated training package covering different topics and using different training methods; what we learn we bring into practice! SoilCares Foundation offers the following trainings:

- soil testing; learn why soil testing is important
- soil sampling; learn how to take a good sample
- soil fertility and agronomy; learn how to increase crop yields
- soil test results and fertilisers
- introduction to soil science

Our trainings score 4.8 out of 5⁽¹⁾

Knowledge in your hands: the soil Scanner

We use the state of the art technology to assess soil fertility status. Know your soil status with one click!

"Now I know how to handle my soil"

Book your training now

SoilCares offers its training as a modular package at 250 Euro (ex. works) for a 1 day training for 15 participants including training material, booklets, certificates and evaluations. For questions and bookings please contact info@soilcaresfoundation.com.
